LINHA UP · PRÉ-MOLDADOS

Acabamento preciso para peças de concreto

A **TRAFBOR®** é uma indústria de artefatos de borracha com produção própria em Bom Jesus dos Perdões (SP). Desenvolvemos e fabricamos perfis extrudados, peças moldadas e soluções técnicas em borracha para a indústria, a infraestrutura, o setor portuário, o saneamento e a logística, com atendimento técnico do projeto à entrega.

Os perfis da linha UP são aplicados em formas metálicas e de madeira da indústria de pré-moldados: chanfros que definem as arestas, frisos e rebaixos de acabamento, e vedações que evitam a fuga de nata de cimento nas juntas da forma.

Fabricados em compostos flexíveis e resistentes à abrasão, mantêm a geometria ao longo de muitos ciclos de concretagem e desmoldagem. Informe o código e a metragem, ou envie o desenho de um perfil especial.

ÍNDICE

PERFIS PARA PRÉ-MOLDADOS

Apresentação e características	2
Perfis UP001 a UP015	3
Perfis UP016 a UP030	4
Perfis UP031 a UP045	5
Contato	6

Características

- Arestas e chanfros bem definidos
- Resistência à abrasão e à desmoldagem
- Fornecimento em rolos ou barras cortadas
- Vedação das juntas da forma, sem fuga de nata
- Reaproveitamento em muitos ciclos
- Desenvolvimento de perfis sob medida

Aplicações

- Vigas e pilares pré-moldados
- Lajes alveolares
- Painéis de fachada
- Aduelas e galerias
- Blocos e peças arquitetônicas
- Formas metálicas e de madeira

Como solicitar um orçamento

01 Identifique o modelo
Localize o código ou a medida na tabela deste catálogo.

02 Informe a quantidade
Metragem, número de peças e o composto ou cor desejados.

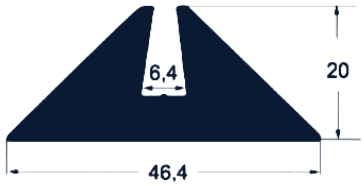

03 Fale com a Trafbor®
WhatsApp (11) 3136-1374 ou telefone (11) 2626-8107.
